

- What do I want to learn or understand better?:
How to structure work and projects, whether they are big or small, in an efficient way. So that I can be able to avoid as many problems and conflicts in the future.
- How can I help someone else, or the entire team, to learn something new?:
The best way, as far as I can see it, is to get the person's/team's opinion heard and understood. So that we can get a read on each other's mindsets which will cause less conflict during the project.
- What is my contribution towards the team's use of Scrum?:
As the scrum master during this week's work I was in charge of the overall direction of the work as well as communicating with the other scrum masters. To ensure that the project, which had a big work force, could result with a good outcome.
- What is my contribution towards the team's deliveries?:
During the work I was in contact with the clients to ensure that we understood their wants for the projects and that they were met. I also had a flexible role to fill the gaps in the workload.
